DO IT YOURSELF

# Flower power candles made with Nutella® jars

Medium

## WHAT IS NEEDED

1 empty Nutella® jar

Leaves or flowers

Flower press or books

Decoupage glue

Brush

LED tealight

Sand

# METHOD

**1** Press the flowers or leaves in the flower press until they are completely dry. This may take a few days. Alternatively you can use books to press them.

**2** Apply the decoupage glue sparingly to the points on the outside of the jar where you are going to position the flowers. Use the size of your flowers as a guide.

**3** Position each flower in turn onto the jar and carefully brush with the decoupage glue.

**Tip:** When brushing the glue on, work from the inside outwards, to prevent creases and wrinkles in your flowers.

4

Cover the bottom of the jar with sand and then place the tealight inside. Your flower power candle holder is finished!
