- 3** | Tie a knot in each pair, approximately 5 cm from the main knot. Repeat for all pairs.

**4** | Bring the adjacent lengths of the pair together and tie them at a distance of approximately 5 cm. Repeat this step for all pairs.

**5** | Bring the adjacent lengths of each pair together and tie them at a distance of approximately 5 cm, for the last time. Repeat this step for all pairs.

**6** | Position the plant on the main knot, and bring all the lengths of cord together. Make sure that the plant pot is standing up straight. Fold the upper cords in the middle and attach the hook or ring. Now tie the ends into one big knot.
