

DO IT YOURSELF

Flower power candles made with Nutella[®] jars

Medium

WHAT IS NEEDED

- 1 empty Nutella[®] jar
- Leaves or flowers
- Flower press or books
- Decoupage glue
- Brush
- LED tealight
- Sand

METHOD

1 | Press the flowers or leaves in the flower press until they are completely dry. This may take a few days. Alternatively you can use books to press them.

2 | Apply the decoupage glue sparingly to the points on the outside of the jar where you are going to position the flowers. Use the size of your flowers as a guide.

3 | Position each flower in turn onto the jar and carefully brush with the decoupage glue.

Tip: When brushing the glue on, work from the inside outwards, to prevent creases and wrinkles in your flowers.

**4**

Cover the bottom of the jar with sand and then place the tealight inside. Your flower power candle holder is finished!
