

DO IT YOURSELF

Nutella® jar wind chime

Easy

To make it, you will need:

- 1 empty Nutella® jar
- Macramé cord
- Mirror/mosaic stones
- Sound bars
- Wooden heart
- Large crystal droplet bead

INSTRUCTIONS

- 1** | Glue the mirror/mosaic stones to the empty jar arranging them in a pattern of your choice.
Note: Be careful not to cut yourself when working with mosaic stones. Children should be supervised by an adult.
- 2** | Use the macramé cord to make a holder for your shimmering jar. You can also wrap the lid of your wind chime with the cord. Make sure you wrap the jar tightly so there's no risk of it falling out later. Instructions for the macramé holder can be found [here](#).
- 3** | A wind chime creates music and sound. To make this happen, tie a strand of macramé knots and prepare the sound bars. The trick here is that by integrating a crystal droplet and the sound bars, you can create great light effects and a gentle sound. Instructions for tying the macramé strand can be found [here](#).
- 4** | Now attach the macramé strand and the sound bars to the underside of the jar. Voila! Your boho-style wind chime is all ready to give to your mum!
